Sample State TA Outcomes:

- Strategic planning for COD service delivery
- Stakeholder development
- Establishment of learning communities
- Increased content knowledge from expert presentations
- Selection of screening and assessment instruments
- State Action Plans for co-occurring disorders
- Evaluation designs

Testimonials from Previous State TA Recipients:

COCE conducted an on-site training for the steering committee and the consumers and provided written material on the use and support of consumer advisors. The TA helped to highlight the importance of selecting the right consumers for participation. I believe consumer involvement and participation was enhanced as a result of this TA event (Andrew Homer, MO COSIG Project Director)

Pennsylvania utilized COCE expertise to provide technical assistance to our Co-Occurring Disorders Advisory Board in the development of infrastructure to support co-occurring program services. COCE provided a national perspective that assisted our Advisory Board in determining recommendations for program and workforce development as key infrastructure development for statewide co-occurring service delivery. (Robert Primrose, PA COSIG Project Director)
